Detailed Description
... transfer of digital cash.

Figure 15 illustrates an exemplary embodiment for allowing end users to select experts.

Figure 16 illustrates an exemplary embodiment of how experts receive and respond to end user requests after being selected by users.

Figures 17, 18, 19, and 20 illustrates an exemplary embodiment for synchronous communications between an expert and an end user. Figure 17 illustrates an embodiment where the end user connects to an online service and is assigned a message window.

Figure 18 illustrates an embodiment of the end...a particular business, the end user may not want central controller 200 to route end user request 120 to certain experts involved with that business. In order to facilitate the end user selecting the expert, the present invention includes an interactive selection embodiment.

Figures 15 and 16 show an interactive selection embodiment which allows the end user to establish an online connection with central controller 200, select a subject area matching end user request 120, select qualified experts, and then submit end user request 120.

Figure 15 describes an embodiment of the present invention wherein the end user selects an expert to respond to request 115. The end user establishes an online connection via the INTERNET, AOL, CompuServe, Prodigy, or other conventional online system to central controller 200... end user is prompted to respond to requests similar to those described in the interactive selection embodiment. As shown in Figure 15, the end user enters his ID, selects the subject, sub-category, and expert level via the IVRU prompts. Central controller 200 automatically connects to an expert already online or calls an appropriate expert and connects the end user.

When the end user is finished asking questions, he hangs up, triggering central controller 200 to end the billing...

Requester's Full Name: Susie D'03 Examiner #: 76267 Date: 1/16/00
Art Unit: 2163 Phone Number 305-1337 Serial Number: 09/482130

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: "Method and Apparatus to Connect Computers to Expre"

Inventors (please provide full names): Randall B. Lauffer 11-07-00A07:25 RCVD

Earliest Priority Filing Date: 3/22/1999 (from 4. App. 60/125,357)

**For Sequence Searches Only* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.*

This is a refocus of an earlier ETC search. The Applicant has significantly narrowed his claims. I found a web site named Expreity.com which reads certain of the claimed invention; however, Expreity.com was up and running until late August, 1999. The founder of the website, Klaus E. Schauer, has one application, but it's not elected. He is a professor at Univ of California, so I thought he might have ~~some~~ written some papers on the subject. I can find the technical papers, but none to the specific Internet application.

I need any references predating the applicant's primary date of filing, which is when claim was made Expreity.com. I have attached copies of my most pertinent references regarding Expreity.com as well as a copy of paper on claim 101.
